*Senior teacher of the department "Foreign languages" of Tashkent
University for Applied Sciences.*

***"Tomorrow's well-being of our planet depends on how our children
grow up to be human beings. Our main task is to create the necessary conditions
for young people to show their potential"***

From the speech of the President

of the Republic of Uzbekistan

Sh. Mirziyoyev at the 72nd session

of the UN General Assembly.

Annotation: *This article is about the opportunities, conditions and
privileges that are being created for our youth in New Uzbekistan, and it serves
to increase their sense of responsibility for the development of the country and
our tomorrow.*

Key words: *achievement, strength and capabilities, subsidies,
entrepreneurship, parents with disabilities, preferential loans, allocating plots.*

As we all know, more than 60% of the 36 million population of Uzbekistan are young people. The historical development path of any country shows that the rapid development of the country, achievement of certain achievements, well-being of the people is closely related to the level of attention paid to the education and future of the youth in that country.

Consequently, the issue of youth in Uzbekistan is one of the most priority areas of state policy. The fact that Chapter XIV of our updated Constitution is called "Family, Children and Youth" also indicates that the wishes of the youth are under the protection of the law. Uzbekistan is using all its strength and capabilities to create modern, advanced and innovative conditions for young people to get an education, acquire a profession, and grow into mature people. Because the more attention is paid to supporting the young generation in every way, raising them to be spiritually mature, physically healthy, patriotic and selfless, protecting their rights and interests, the more effective it will be.

In our country, systematic work is being carried out aimed at educating the young generation and creating all the necessary conditions for them to take an independent step into life. As a result of the initiative and support of our honorable President, unprecedented work in the field of youth has been carried out and is being carried out in our country.

In recent years, work on supporting young people has reached a new level. In particular, the Youth Affairs Agency under the Cabinet of Ministers of the Republic of Uzbekistan dealing with youth affairs, the "Youth Parliament" was established under the Youth Academy and Oliy Majlis Chambers, and the "Project Factory" started working in the regions. Special attention is paid to quality education, vocational training and employment of young men and women.

A vertical management system was created to organize these works in the neighborhood. Dedicated and enterprising youth leaders were appointed to 9,500 neighborhoods. More than 100 opportunities have been created for young people. For example, in 2023, 4 trillion soums of loans were given on preferential terms for youth entrepreneurship, 150,000 projects were launched, and 325,000 jobs

were created. 43,000 hectares of arable land has been allocated and 435,000 youth employment has been provided. More than 32,000 young people were given equipment, tools and computers through subsidies.

The head of our country considers these expenses to be not an expense, but the most effective investment for the future, and emphasizes that the level and quality of education is an important factor that determines the prospects of any country. To increase the legal literacy of young people in all regions, districts, cities and neighborhoods of our republic, to create job vacancies and to help them earn high incomes and to create new ideas and projects, to prevent crime among young people and minors,

In order to protect them from smoking and drinking, to increase the entrepreneurship of young people, meetings such as "Hokim and youth" and "Leader and youth" are being organized. Young people who have problems and need help are invited to these meetings, and official leaders provide them with legal assistance. A number of benefits have been created for our young people to find their proper place in our society, and many young people are taking advantage of this benefit. For example: - The education of women and girls at the master's level of Higher Education Institutions is fully provided by our state; - Subsidies for self-employment and purchase of labor tools and equipment for young people with disabilities aged 18 to 30; - Special letters of recommendation for our young men who have successfully completed their military service to enter Higher Education Institutions; - Quotas of 4% for daughters of citizens in single-parent families or one of their parents with disabilities; - Allocating plots of water lands to unemployed youths for farming; - Preferential loans for young people who want to do business; - Subsidized mortgage loans for house purchase; - Full reimbursement of education expenses abroad from the funds of "El Yurt Umidi" fund; - We can list safe and reliable foreign migration and many similar benefits and opportunities. In order to take advantage of this opportunity, it is necessary for our youth to have the qualities of leadership, aspiration, and inquisitiveness. It

is also necessary for a leader to set a clear goal for himself, and to achieve it in a certain order, and to embody qualities.

The issue of educating our youth, who are the future of our country, as mature, knowledgeable, potential individuals, perfect human beings is being approached in a unique way even in today's quarantine days, on the basis of modern methods. Our country is a country of happy youth, as mentioned above, about 64% of the population of our country are young people, that is, people under 30 years old. Of course, if we bear in mind that this is a huge responsibility for our state, it requires a lot of attention and care. Because now more than half of Uzbekistan's labor resources are young people.

In the future, every third leader will be young people. For this reason, youth has been recognized as an active layer of society in all times. The role of young people was incomparable in the period of the Eastern Renaissance, in the activities of the moderns, and in the renewal of society. In this regard, this layer, which is formed regularly, requires constant guidance and support... This means that the state takes measures aimed at creating optimal conditions and opportunities for free socialization and effective self-expression of young people in the interests of the country, as well as supporting young people. the system of activities refers to the state policy regarding youth.

Therefore, the greatest attention in our country is aimed at educating independent-thinking, enterprising, ambitious young people.
